

Looking for No-Risk CRISPR KO Cell Line?

LIMITED TIME & 15EA ONLY
~2023. 12. 21

Special Offer 40% Off

리스크 없이 쉽고 확실한 CRISPR Stable Knockout Cell Line을 주문하세요.

- Step 1** Accession number로 유전자를 선택
- Step 2** Cell을 제공
- Step 3** 세포주를 맞춤 제작하여 공급해 드립니다!

Service Details

Our Basic Package (C208) Includes

1. Cell line Validation (e.g. infection condition optimization, drug selection evaluation, Single cell clonability evaluation etc.)
2. sgRNA vector design, construction & delivery into cells
3. Clonal screening and selection
4. Screening & validation of knockout by Sanger sequencing
5. Expansion & cryopreservation of selected clone(s)
6. Microbial/sterility testing

Deliverables

Sequence verified knockouts (2 clones, 1 vial per clone), microbial/sterility tested with a service report.

* Choose from HEK293, HEK293T, A549, HeLa, MDCK, A375, HepG2, HT1080 or U87MG.
These cell lines are available as Cas-9 expressing versions or parental versions.
Cas9 expressing version will be used by default. If the parental version is preferred, please request prior to order placement.

** 할인행사는 Adherent Cell에 한합니다.

Add-On Services ; 20% Off

C142	WT Control Cell Line Expressing Cas9 for Comparison	1 Cell Line
C143	Additional Clones	1 Clone
C144	Additional Vials of Delivered Cells	1 Vial
C145	Western Blot Validation Service	1 Clone
C287	Cell Line Authentication: STR Profiling of 1 WT Human Parental Cell Line & 1 Human Knock-Out Cell Line Clone (For other species, please inquire)	1 Service
